

eShare User Group

What can the User Group achieve?

We have always believed that technology is the key to achieving better governance.

The User Group has been established to help continually develop further applications of the eShare System with the users to ensure we continue to provide a product which meets your needs. Together we can discuss the issues you face and work to develop new ways to help overcome these problems.

The ultimate goal is to create a solution which really works – designed for charities by charities.

Who is it designed for?

The User Group is for anyone who is interested in developing eShare further to create a completely bespoke service for their needs - all users are welcome to attend.

What topics are covered?

The User Group focuses on current issues and looks at how either our current modules – eKnowledge, eMeetings, eDecisions, eControls and eView – can be developed further, or a new module created, to help overcome the issues.

The User Group is also used to showcase new developments at eShare and demonstrate how they can be of benefit to others.

Do users need to attend every session?

There is no requirement to attend every session. Any member who is unable to attend will be kept up to date with the latest developments, and should you wish, we can always visit you and provide a personal demonstration.

How much does it cost to attend?

Attending the User Group is Free.

Where can I find more information?

More information about the User Group can be found on our website: www.eShareCharities.com or by calling 0845 200 7829

User Group

eShare currently contains 5 main modules:

- eKnowledge
- eMeetings
- eDecisions
- eControls
- eView

The eShare User Group enables users to work with us to develop the system further and create additional functionality to help tackle the issues they face.

The ultimate goal is to create a solution which really works.
